

# Protect what you've built

Cybersecurity solutions for small businesses

**Cybercriminals are targeting organizations of all sizes, searching for unique vulnerabilities to exploit and using different forms of attack.**

Many small- and medium-sized businesses (SMBs) recognize cybersecurity as a key priority. But it can be difficult to spot vulnerabilities and identify the right security solutions.

## A problem that needs attention

SMBs work hard to build their businesses. But just one convincing phishing email can lead to a breach, with major financial, reputational and other repercussions. The time to prepare is now.

## Where we come in

The same partner you rely on to help connect your business can also help protect your business from an array of cyberthreats. We offer a robust portfolio of simple but powerful cybersecurity solutions tailored to your needs.

## Advantages of Verizon

### Trusted security

Simplify and strengthen your cybersecurity defenses with a variety of trusted solutions.

### Tailored protection

We can help you identify a cybersecurity solution that is tailored to your business needs and can grow with your business.

### Security expertise

We have decades of experience in network security and threat intelligence across industries and markets.

**Help safeguard your small business with our cybersecurity solutions.**
