Focus on your business while we take care of your business internet needs.

Choose Business Internet Professional Managed Services, and get back to business.

Internet downtime can be costly. Our managed internet services solutions can help you stay connected.

Whether you're processing online transactions, communicating with clients or accessing vital data, you need a reliable internet connection. But we get it. You have more important things to do than worry about what will happen if your network goes down.

Verizon Business Internet Professional Managed Services offers proactive device monitoring and next business day replacement for defective equipment to help keep your business moving.

With the right business internet and services, anything is possible.

Our Business Internet Professional Managed Services provides support from installation through device monitoring and maintenance. With our innovative solution, you can focus on your core operations knowing that your devices are being managed efficiently and effectively.

Rely on our unwavering support and expertise to help you make everything about your business internet easier. Our Business Internet Professional Managed Services comes with:

24/7 monitoring
Get monitoring to verify that your device is operational and help desk support to assess and diagnose device issues.

Site survey
We'll make a physical assessment and conduct a test indoors and outdoors to find the setup that matches your needs.

Staging and kitting
Our experts will walk you through the process from package configuration through selection and shipping.

Hardware replacement
Next business day replacement for defective hardware with shipping is included.

No long-term service contract
Get the flexibility you need without having to sign a long-term service contract.

Harness the power of business internet.

Verizon business internet is a high-speed, fixed wireless access service that uses 5G and 4G LTE wireless technologies to deliver reliable, secure and affordable wireless broadband connectivity. Depending on your needs, it can be professionally installed or a self-setup solution.

business

Our experts can help you find the installation process that works best for your business.

Remote installation
Get phone support to install and activate your router without the need for on-site support.

Indoor installation
Choose indoor installation if no cable pull or CAT5e is required.

Outdoor wall installation
Get outdoor device wall mount installation with up to 300-foot CAT5e cable and drop, grounding, and mounting hardware.

Roof installation
Have your devices installed with a nonpenetrating rooftop mount, 300-foot CAT5e cable and drop, grounding, lightning arrestor, and mounting hardware.

Business internet designed to adapt to the needs of your business

Aligning to best serve your vision and unique environment, our Professional Managed Services team can expertly customize and deploy wireless business internet for you. Get Verizon wireless business internet and add our Business Internet Professional Managed Services to help you manage your non-Verizon devices and make managing your business internet easy.

Why Verizon

Verizon offers decades of experience providing secure, reliable communications to businesses like yours. Our business internet is now available with professionally managed services as an add-on, so you won't be on your own when it comes to managing your wireless business internet devices.
