

# Advanced Business Internet

**Simplify the deployment, management and billing for your wireless business connectivity.**

## Why utilize wireless business internet?

Business customers are embracing the power of 5G/LTE to achieve their goals. We support our customers on their path to transform business operations with next generation technology, to help achieve optimal network performance and an enhanced end user experience.

Whether customers visit a food truck at an event or shop at a “store within a store” at the mall, they expect online ordering and seamless, interactive experiences. Wireless business internet lets you compete in ways and in locations you never considered possible. This solution simplifies your ability to order, deploy and manage Wireless Business Internet connectivity across your entire business footprint.

## Why utilize these bundles?

Effective connectivity requires survey, planning, deployment, and management of the right solution for each unique location. With this simplified set of bundles, our team of experts can assist at any point during your 5G/LTE wireless connectivity journey.

## Bundles for simplified remote connectivity

To simplify our customer journey, we have developed five bundles that can enable Wireless Business Internet on site.

- **Branch office bundle:** Includes shipping & activation, site survey, basic installation, 24x7 management of the activated solution and next business day maintenance support.<sup>1</sup>
- **Branch office plus bundle:** Includes shipping and activation, site survey, basic installation, 24x7 management of the activated solution, next business day maintenance support and 4 hour hardware replacement.<sup>1</sup>
- **Field office bundle:** Includes shipping and activation, remote installation support, 24x7 management of the activated solution and next business day maintenance support.<sup>1</sup>
- **Professional installation:** Includes shipping and activation, site survey and basic installation for a one-time charge.<sup>1</sup>
- **Self-install:** Includes shipping and activation and remote installation support for a one-time charge.<sup>1</sup>

## Benefits and value delivered

Leverage carrier expertise in design and implementation of 5G/LTE connectivity over Verizon's Wireless Business Internet.

Utilize simplified wireless connectivity deployment to meet ongoing or expected operational needs.

Support temporary locations with immediate service deployment.

Service Level Agreement's for both network and support

Simplified Hardware rental options to reduce upfront costs.

Prepare for future innovation enabled by Wireless Business Internet.
